Climate

Commercial

Place

Data is key to scale and pace

Two parts of the same problem

Net Zero

Adaptation

The Route to Net Zero

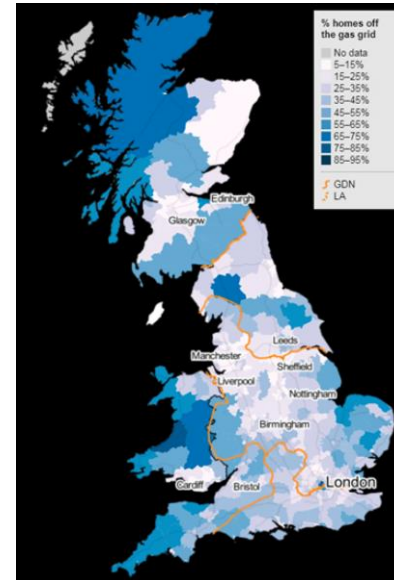

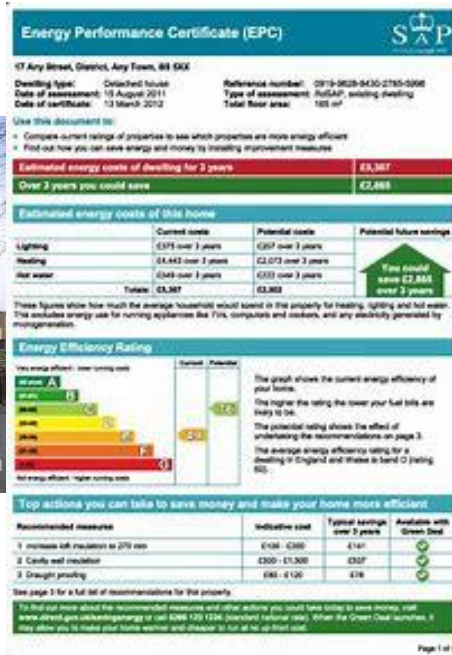

Use less

Electrify everything

Generate renewables

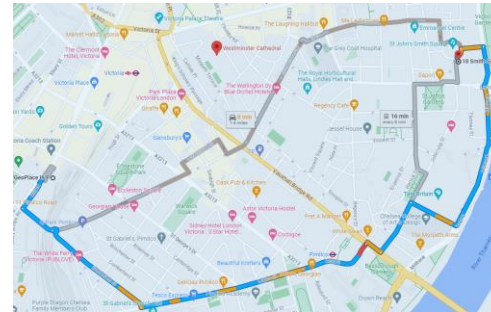

Buildings mitigation

Types, ownership and uses – reliable passive data

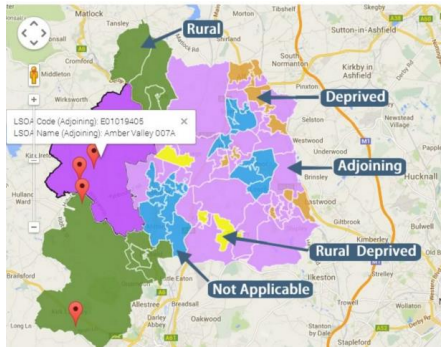

Transport mitigation

Existing uses – the emergence of dynamic data

Adaptation challenges

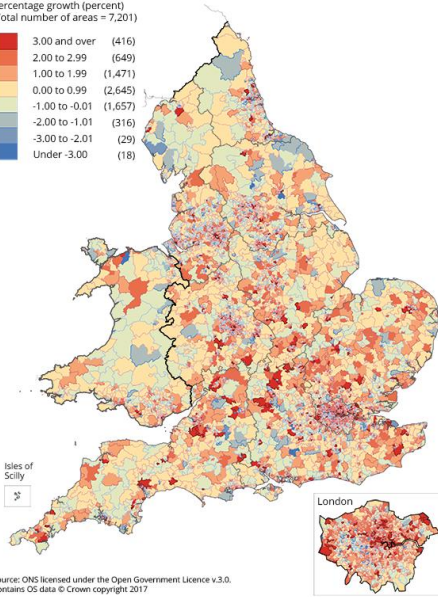

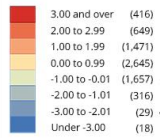

Understanding risks and impacts at the local level

Data is key

Rapid change with big data

Percentage growth (percent)
(Total number of areas = 7,201)
