5 steps to find
unlicensed
HMOs

nesta

Step 1: Interrogate HMO features with inspectors

Step 2: Identify datasets associated with features

Step 3: Use machine learning to weight the criteria

Step 4: Add data from other boroughs

Step 5: Testing and evaluation

Place matters

The pace of change is accelerating

There is a growing community of innovators, data scientists and service designers

They love the UPRN – when they get to see it

Data quality matters

They need data custodians to provide high quality, relevant easy to use data

We need them to help **bring location to life**
