

# Express Asphalt

Experts in the Utility Sector

# It's Happening....

Greater Risk

# PENALTY NOTICE!

## Avoid Expensive Air Void & Visual Inspection Failures

- An asphalt solution designed specifically for utility reinstatement contractors.
- Highly Workable & Compactable
- Designed to allow contractors to achieve the air voids requirements of the reinstatement specification
- More Durable Than Traditional Asphalt
  - Lasts Longer
  - Reduces Potential for joint & surface fretting
  - Visual Failures

Max Voids Permissible  
= 13%

Achievable with  
Standard Materials = 8-  
10%

4-5% Voids  
Achievable

Giving you a greater tolerance to meet  
SROH specification compared to  
standard 6mm dense material
