

# Property Portfolio Register

## Simplifying Local Authority Property Management

### About the service

Property Portfolio Register (PPR) combines all your property asset data in one centralised system, enabling all aspects of a property's lifespan to be managed from pre-acquisition to disposal. PPR's inbuilt checks and balances will reduce errors and maintain accountability, while the comprehensive reporting will help you to better understand your property data and its utilisations, interests and burdens.

### Benefits of PPR

- Manage all aspects of your property data in one place
- Inbuilt checks and balances help to maintain the accuracy of your data
- Receive timely alerts for any property that requires further action or attention
- Visualise relationships between property interests with inbuilt mapping functionality
- Improve continuity with clear processes and actions
- Full audit trails to ensure accountability
- Comprehensive reporting functionality
- Reduce duplication of work

Gain complete control  
over your property  
portfolio.

## Inbuilt Mapping Functionality

Visualise your property data with PPR's inbuilt mapping functionality. Accessible to even non-technical users, the inbuilt map makes identifying relationships between properties and their interests quick and easy. With advanced search options, users can find records across multiple strands of data directly on the map, helping property departments prioritise their workload efficiently and streamline the management of their property portfolio.
