

Table 13 Accurate addressing: navigating the challenges of a changing landscape

Josh Gooch, Senior Spatial Data Analyst, GeoPlace

In today's rapidly changing world, maintaining high quality address data can be challenging. New developments, changes within the built environment and raising standards all add layers of complexity. From ensuring precise positional accuracy to staying on top of property lifecycle and keeping up with organisation changes staying ahead is not straight forward.

Let us know:

- What aspects of managing address data do you find the challenging?
- What additional support do you think GeoPlace can offer to help overcome these challenges?
