

Roundtable 12: The Improvement Schedule process

**Kerry Pearce, National Address Data Manager, and Steven Clelland,
Deputy National Address Data Manager GeoPlace**

- LAs generally positive about IS changes being spread out Quarterly, rather than the current Annual.
 - Would make sense to focus on a particular theme each quarter
- LAs want the reasoning behind each new check / change – who is asking for it and why
- Positive feedback to Additional checks on Geogateway (1 there so far). We should aim to deploy upcoming IS checks there
- Completing the IS consultation is a big task in itself. Anything we can do to make it easier + more easily understandable appreciated. We should aim to do a workshop during or just before the consultation to summarise the proposals
